# OUR BEST SERVICES

## Pretty Smart Home

### Pretty Smart Home

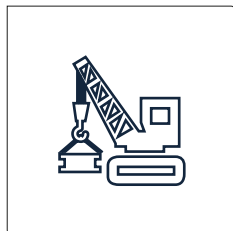

Smart home technology, also often referred to as home automation or domotics (from the Latin "Domus" meaning home), provides homeowners security, comfort, convenience, and energy efficiency by allowing them to control smart devices, often by a smart home app on their smartphone or another networked device.

A person's hands are shown holding a smartphone. The screen displays a smart home control interface with a central house icon and several circular icons for different functions like lighting, temperature, and security. Below the icons, the text "Temperature settings" is visible, followed by a thermometer icon and the number "24°C". A slider control is also present. The background shows a modern kitchen with a wooden table, white chairs, and brick walls.
